

AVULUX 

Migraine & Light Sensitivity
Eyewear

NOW AVAILABLE FROM

ASAHI-LITE®

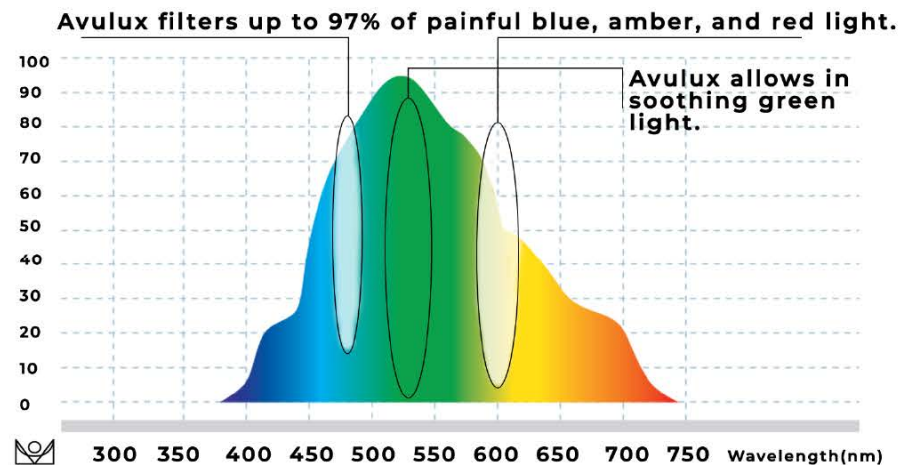

Why Avulux® Works

Light sensitivity can be debilitating. Over 80% of people with migraine are light sensitive and up to 60% of migraines are caused by light or glare.

Melanopsin secreting cells in your eye are triggered by exposure to certain light and it can lead to migraine attacks, and increased pain or irritation to light sensitive individuals.

Avulux filters up to 97% of the most painful **blue**, **red**, and **amber** light while allowing in soothing **green** light.

Avulux was clinically proven to reduce or prevent migraine pain and relieve light sensitivity - allowing you to continue with your day.

How to Use Avulux®

Acute Treatment

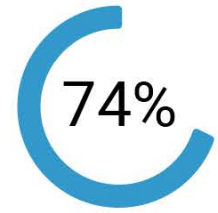

Wear Avulux as soon as you feel any migraine symptoms or when you're light sensitive.

Preventative

Wear Avulux throughout your day and during any trigger activities like extended screen time and when faced with harsh light.
